# LOGGING IN

Your ID is `@name:server.tld`, e.g. `@max:myhome.com`.  
So `@max` is your username and `:myhome.com` is your server.

When logging in, you must specify the server so that the app knows where you want to connect. As the user `@max` could also exist on another server too!

The screenshot shows the RIOT-IM login interface. On the left is a sidebar with the RIOT-IM logo and a language dropdown set to 'Deutsch'. The main content area is titled 'Anmelden' and includes a section for 'Other servers' with a link 'What does this mean?'. Below this are two input fields: 'Homeserver URL' containing 'https://meinzuhause.de' and 'Identity Server URL' containing 'https://vector.im'. A large green button labeled 'Nächstes' is positioned below the fields, and a smaller 'Create account' link is at the bottom.

This screenshot shows the main login form of the RIOT-IM app. At the top is the RIOT-IM logo. The form contains several input fields: 'E-Mail oder Nutzername', 'Telefonnummer', and 'Passwort'. There is a checked checkbox for 'Benutzerdefinierte Server-Optionen (erweitert)'. Below this, there are fields for 'Home-Server-URL' (containing 'https://meinzuhause.de') and 'Identitätsserver-URL' (containing 'https://vector.im'). A link for 'Passwort vergessen?' is located below the password field. At the bottom, there are two buttons: 'KONTO ERSTELLEN' and 'ANMELDEN'.
